PREMIUM INTERIOR SUBSYSTEM DEVELOPMENT AND QUALITY SUPPORT

OBJECTIVES

- Provide overall program leadership, product and process development, and quality support on a premium leather-wrapped interior subsystem, including instrument panel, floor consoles, hard trim, overhead, restraints, floor trim, and door trim assemblies

RESULTS

- Collaborate with client's customer on product design and technical kickoff
- Support client milestone gate reviews used for checkpoints
- Maintain accurate BOM and all other change management documentation
- Collaborate with manufacturing plant to provide appropriate tools and processes
- Support milestone deliverables—both on time and with quality
- Represent program team at client manufacturing plant and client's customer assembly for all phases of the program
- Achieve full PPAP for all commodities
