INCOMING INSPECTION FOR SEATS

APPROACH

- Build a database with the information needed create reports regarding recurring issues found during incoming inspection
- Perform traceability analysis
- Identify liability issues in a more efficient manner
- Decrease the time invested in fixing seat issues after installation

RESULTS

- Provided clear identification of when client or supplier is liable
- Minimized time invested for fixing seat problems after final client review
- Created a database to be shared with different teams to analyze data and identify if a problem is recurring and, if it is, implement corrective actions

KEY TOOLS & TECHNOLOGIES

- Client proprietary software
- Snag sheet document
